INDEX

Abnormalities, congenital and acquired, on certain, of the pulmonary artery, 51.
Action of adrenalin chloride, the, on the human heart, 459; of digitalis in cardiac failure, the, with normal rhythm, 153; protective, of serum against haemolysin, a study of the, in cases of diphtheria, 345.
Adrenalin chloride, the action of, on the human heart, 459.
Allied disorders, post-encephalitic Parkinsonism and, the seborrhoeic facies as a manifestation of, 177.
Analytical study, an, of 150 cases of sprue, 523.
Aneurysm, 'congenital', of the cerebral arteries, 419.
Aneurysmal dilatation of the left auricle, 187.
Aortic and pulmonary valves, the clinical importance of variations in the number of cusps forming the, 383.
Arteries, 'congenital' aneurysm of the cerebral, 419; human, the extensibility of, 489.
Artery, pulmonary, on certain abnormalities, congenital and acquired, of the, 51.
Association of Physicians of Great Britain and Ireland, Proceedings of the, *at end of volume.*
Auricle, left, aneurysmal dilatation of, 187.
Auricular flutter, the course and treatment of, 21.

Barlow's disease (infantile scurvy), the histological and radiographic appearance of, 499.
Bile, human, the composition of, and its bearing upon sterol metabolism, 107.
Blood cholesterol, the, in nephritis, 297.
Brain, the iron content of the tissues in haemochromatosis, with special reference to the, 123.

Carbohydrate tolerance, does insulin improve, in diabetes? 211.
Cardiac failure, the action of digitalis in, with normal rhythm, 153.
Cerebral arteries, 'congenital' aneurysm of the, 419.
Cerebro-spinal fluid, glycolysis in, and its clinical significance, 91.
Child, English school, goitre in the, 223.
Chloride, the action of adrenalin, on the human heart, 459; observations on the excretion of water and, after their oral administration, 71.
Cholesterol, the blood, in nephritis, 297.
Circulation rate, the, in some pathological states, with observations on the effect of digitalis, 277.
Clinical eriometer, the, 83; and metabolic study, a, in obesity, 325; importance, the, of variations in the number of cusps forming the aortic and pulmonary valves, 383; significance, glycolysis in cerebro-spinal fluid and its, 91.
Composition of human bile, the, and its bearing upon sterol mechanism, 107.
'Congenital' aneurysm of the cerebral arteries, 419; and acquired, on certain abnormalities, of the pulmonary artery, 51.
Course and treatment, the, of auricular flutter, 21.
Creatine and rigidity, 401.
Cusps, variations in the number of, forming the aortic and pulmonary valves, the clinical importance of, 383.

Diabetes, does insulin improve carbohydrate tolerance in, 211; mellitus, the use of synthalin in the treatment of, 509.
Diabetic, studies of an insulin-resistant, 359.
Diaphragmatic paralysis as a therapeutic measure in intrathoracic disease, 463.
Digitalis, the action of, in cardiac failure with normal rhythm, 153; observations on the effect of, on the circulation rate in some pathological states, 277.
Dilatation, aneurysmal, of the left auricle, 187.
Diphtheria, cases of, a study of the protective action of serum against haemolysin in, 345.
Disease, intrathoracic, diaphragmatic paralysis as a therapeutic measure in, 463.

English school child, goitre in the, 223.
Eriometer, the clinical, 83.
Excretion of water and chloride, observations on the, after their oral administration, 71.
Extensibility of human arteries, the, 489.

Facies, the seborrhoeic, as a manifestation of post-encephalitic Parkinsonism and allied disorders, 177.
Failure, cardiac, with normal rhythm, the action of digitalis in, 153.
Fasting gastric secretion, the, in man, 7.
Fever, rat-bite: a study of the experimental disease, with a critical review of the literature, 433.
Fluid, cerebro-spinal, glycolysis in, and its clinical significance, 91.
Flutter, the course and treatment of auricular, 21.

Gastric secretion in man, the fasting, 7.
Glycolysis in cerebro-spinal fluid and its clinical significance, 91.
Goitre in the English school child, 223.

Haemochromatosis, the iron content of the tissues in, with special reference to the brain, 123.
Haemolysin in cases of diphtheria, a study of the protective action of serum against, 345.
Heart, human, the action of adrenalin chloride on the, 459.
Histological and radiographic appearance, the, of infantile scurvy (Barlow's disease), 499.
Human arteries, the extensibility of, 489; bile, the composition of, and its bearing upon sterol metabolism, 107; heart, the action of adrenalin chloride on the, 459.

Infantile scurvy (Barlow's disease), the histological and radiographic appearance of, 499.
Insulin: does it improve carbohydrate tolerance in diabetes? 211.
Insulin-resistant diabetic, studies of an, 359.
Intrathoracic disease, diaphragmatic paralysis as a therapeutic measure in, 463.
Iron content of the tissues in haemochromatosis, with special reference to the brain, 123.

Late effects, the, of war nephritis, 1.
Left auricle, aneurysmal dilatation of the, 187.
Literature of rat-bite fever, a study of the experimental disease, with a critical review of the, 433.

Man, the fasting gastric secretion in, 7.
Metabolic study, a clinical and, in obesity, 325.
Metabolism, nitrogenous, in post-encephalitic rigidity, 139; sterol, the composition of human bile and its bearing upon, 107.

Nephritis, the blood cholesterol in, 297; war, the late effects of, 1.
Nitrogenous metabolism in post-encephalitic rigidity, 139.
Normal rhythm, the action of digitalis in cardiac failure with, 153.

Obesity, a clinical and metabolic study in, 325.
Observations on the excretion of water and chloride after their oral administration, 71; on the pulmonary ventilation and oxygen consumption in pulmonary tuberculosis, and on the effect of the respiratory quotient on the relation between pulmonary ventilation and oxygen consumption, 371.
Oral administration, observations on the excretion of water and chloride after their, 71.
Oxygen consumption, observations on the pulmonary ventilation and, in pulmonary tuberculosis, and on the effect of the respiratory quotient on the relation between pulmonary ventilation and oxygen consumption, 371.

Paralysis, diaphragmatic, as a therapeutic measure in intrathoracic disease, 463.
Parkinsonism, post-encephalitic, and allied disorders, the seborrhoeic facies as a manifestation of, 177.
Pathological states, the circulation rate in some, with observations on the effect of digitalis, 277.
Physicians of Great Britain and Ireland, Proceedings of the Association of, *at end of volume.*
Post-encephalitic Parkinsonism and allied disorders, the seborrhoeic facies as a manifestation of, 177; rigidity, nitrogenous metabolism in, 139.
Protective action of serum, a study of the, against haemolysin in cases of diphtheria, 345.
Pulmonary artery, on certain abnormalities, congenital and acquired, of the, 51; tuberculosis, observations on the pulmonary ventilation and oxygen consumption in, 371; valves, aortic and, the clinical importance of variations in the number of cusps forming the, 383; ventilation and oxygen consumption, observations on the, in pulmonary tuberculosis, and on the effect of the respiratory quotient on the relation between pulmonary ventilation and oxygen consumption, 371.

Quotient, respiratory, effect of the, observations on the, on the relation between pulmonary ventilation and oxygen consumption, 371.

Radiographic appearance of infantile scurvy (Barlow's disease), the histological and, 499.
Rat-bite fever: a study of the experimental disease, with a critical review of the literature, 433.
Rate, the circulation, in some pathological states, with observations on the effect of digitalis, 277.
Respiratory quotient, observations on the effect of the, on the relation between pulmonary ventilation and oxygen consumption, 371.
Rhythm, cardiac failure with normal, the action of digitalis in, 153.
Rigidity, creatine and, 401; post-encephalitic, nitrogenous metabolism in, 139.

School child, English, goitre in the, 223.
Scurvy, infantile (Barlow's disease), the histological and radiographic appearance of, 499.
Seborrhoeic facies, the, as a manifestation of post-encephalitic Parkinsonism and allied disorders, 177.
Secretion, the fasting gastric, in man, 7.
Serum, a study of the protective action of, against haemolysin in cases of diphtheria, 345.
Significance, clinical, glycolysis in cerebrospinal fluid and its, 91.
Sprue: an analytical study of 150 cases, 523.
Sterol metabolism, the composition of human bile and its bearing upon, 107.
Studies of an insulin-resistant diabetic, 359.
Study in obesity, a clinical and metabolic, 325.
Synthalin, the use of, in the treatment of diabetes mellitus, 509.

Therapeutic measure, diaphragmatic paralysis as a, in intrathoracic disease, 463.
Tissues in haemochromatosis, the iron content of the, with special reference to the brain, 123.
Tolerance in diabetes, does insulin improve carbohydrate, 211.
Treatment of auricular flutter, the course and, 21; of diabetes mellitus, the use of synthalin in the, 509.
Tuberculosis, pulmonary, observations on the pulmonary ventilation and oxygen consumption in, 371.

Valves, variations in the number of cusps forming the aortic and pulmonary, the clinical importance of, 383.
Variations in the number of cusps forming the aortic and pulmonary valves, the clinical importance of, 383.
Ventilation, pulmonary, and oxygen consumption in pulmonary tuberculosis, observations on the, and on the effect of the respiratory quotient on the relation between pulmonary ventilation and oxygen consumption, 371.

War nephritis, the late effects of, 1.
Water and chloride, observations on the excretion of, after their oral administration, 71.
